fever  
chills  
night sweats

### Respiratory:

Asthma  
Shortness of breath  
Bronchitis  
COPD  
emphysema  
use of oxygen  
pneumonia  
recent cough  
TB

### Integumentary/Skin:

skin cancer  
skin precancer  
new or changing lesion  
rashes  
cold sores  
herpes

### Eyes:

eye pain  
vision changes  
double vision  
eye irritation  
dry eyes  
excessive tearing  
red eyes  
glaucoma  
cataracts  
contact lenses  
sensitivity to light  
LASIK  
other eye surgery  
eyelid surgery

### Neurologic:

stroke  
sensory loss  
weakness  
seizures  
headache  
fainting spells  
head injury

### Gastrointestinal:

peptic ulcers  
reflux/heartburn  
indigestion  
vomiting  
difficulty swallowing solids  
difficulty swallowing liquids  
diarrhea  
constipation  
blood in stools  
black stools  
change in bowel habits  
hepatitis  
jaundice  
liver cirrhosis

### Psychiatric:

depression  
alcoholism  
drug abuse  
anxiety  
marital problems

### Ear Nose Throat:

hearing loss  
ringing in the ears  
dizziness  
ear pain  
ear drainage  
past nasal trauma  
post nasal drip  
difficulty breathing through nose  
sinus infections  
past nasal or sinus surgery  
dental problems  
tooth pain  
oral cancers  
dentures  
capped teeth  
cold sores  
voice changes

### Endocrine:

diabetes  
thyroid disorder  
hypoglycemia  
adrenal disorders

### Genitourinary:

urinary tract infections  
yeast infections  
difficulty urinating  
frequent urination  
kidney stones  
kidney failure  
STD

### Hematologic/Lymphatic:

bleeding disorders  
anemia  
easy bruising  
bleeding gums  
swollen lymph nodes

### Musculoskeletal:

bone or joint injuries  
swelling  
extremity pain  
joint pain  
weakness in arms or legs  
arthritis  
leg cramps  
difficulty walking

### Allergic/Immunologic:

seasonal allergies  
hay fever
