

OBAGI®

Obagi® Skin Care
Program

Nu-Derm® System

Over the years, your skin has been exposed to a number of environmental stressors, which cause damage that can reach the deepest layers of your skin. Photodamage, caused by the sun's harmful rays, is the main cause of the fine lines, wrinkles and age spots that you may already see or you will eventually see on your face.

The Nu-Derm System is the physician-dispensed, prescription-strength skin care system that can actually transform your skin at the cellular level. By addressing the signs of photodamage and restoring the healthy function of your skin cells, this system is clinically proven to result in younger- and healthier-looking skin.

Obagi-C® Rx Systems

Over-the-Top Protection You Won't Find Over-the-Counter

With Obagi-C Rx, you're on your way to healthier, refreshed, revitalized skin from cell to surface. Obagi-C Rx Systems promote skin rejuvenation from the inside out using a formulation of prescription-strength 4% hydroquinone, which reduces

the appearance of hyperpigmentation and age spots, combined with 10% L-ascorbic acid (Vitamin C)—the only topical antioxidant proven to stimulate collagen synthesis and protect your skin by minimizing future skin cell damage.

Obagi-C Rx Systems are ideal skin care if you have...

- Minimal fine lines
- Minimal unevenness of skin tone
- Mild hyperpigmentation and minimal age spots
- Intolerance to, or are not ready for, more aggressive anti-aging regimens
- Dry, normal, oily, or even sensitive skin

Obagi Professional-C Serums™

Your skin deserves all the protection you can give it from daily exposure to the sun's damaging rays and environmental conditions that cause premature aging. Visible signs of aging, those fine lines and wrinkles, are caused by tiny molecules known as 'free radicals.' Free radicals dramatically multiply with exposure to sun, air pollution and other environmental assaults, ravaging skin cells and breaking down collagen that gives skin its youthful resilience.

Professional strength Vitamin C can give your skin the superior protection it needs to:

- Prevent premature signs of aging, including fine lines and wrinkles
- Protect against future damage
- Stimulate collagen production for firmer, more resilient skin
- Lighten and brighten skin for more even tone

ELASTIderm® Eye Treatment

The eye treatment that works to reduce the appearance of visible fine lines and wrinkles around your eyes. We know you've been frustrated. You're not alone. But now that ELASTIderm has arrived, your frustration ends here. And this is the one-of-a-kind product that can not only change the way you think about eye treatments, it can change the way you look.

ELASTIderm is a one of a kind eye treatment from Obagi Medical Products. By using a revolutionary bi-mineral complex called Copper Zinc Malonate, it works to help restore the elasticity around your eyes and reduce the appearance of visible fine lines and wrinkles.

ELASTIderm® Décolletage

These days your skin is aging a lot more quickly. The sun and environmental elements can take their toll, leaving behind hyperpigmentation (discoloration), age spots, freckles, fine lines and wrinkles. And although you may have diligently maintained the skin on your face for years, you may not have paid as much attention to the skin on your chest and neck, also known as your décolletage.

The skin on your décolletage is particularly vulnerable to these visible signs of aging, since it tends to be thinner, less moisturized, and often overlooked in the sun protection regimen. The result can be a harsh contrast between the youthful, protected skin on your face and the discolored, damaged skin on your chest.

So, take steps today to revitalize your décolletage skin with a regimen specially formulated to reveal a more radiant all-over glow in this highly visible area.

CLENZIderm M.D.™ Systems

Penetrate to the root of acne to clear skin fast

Obagi CLENZIderm M.D. Systems are the only prescription-strength acne treatments that contain a patented, solubilized form of 5% benzoyl peroxide (BPO) to penetrate deep into the follicle and treat acne where it starts.

Who can benefit from the CLENZIderm M.D. Normal to Oily System?

- Patients with normal to oily skin
- Patients who prefer gels
- Patients with less sensitive skin who can tolerate most topical acne treatments

Who can benefit from the CLENZIderm M.D. Normal to Dry System?

- Patients with normal to dry skin
- Patients who prefer lotions
- Patients with sensitive skin, or skin that is naturally dry
- Patients looking to minimize side effects of retinoids or other acne treatments

Ask your skin care professional today which CLENZIderm M.D. System is right for you.

Rosaclear™ System

It is the first and only complete therapeutic system developed specifically for treating the signs and symptoms of rosacea. The all-in-one system is designed to effectively reduce redness and flushing, along with treating papules and pustules (acne-like pimples), to help rosacea patients achieve a clearer, calmer and more balanced-looking complexion.

Start enjoying a clearer, calmer, more balanced-looking complexion today! Ask your physician if the Rosaclear System is right for you.
